PSC & KVSC Government College, Nandyal

Department of Computer Applications

Best Practices

1. Continuous Assessment:

We are implementing regular assessments, including quizzes using formative assessment tools such as Plickers, Google Form, Kahoot, etc., and project evaluations, to ensure continuous learning and understanding. We provide constructive feedback to help students improve.

2. Internship and Industry Exposure:

Facilitate internships, co-op programs, or industry partnerships to provide students with real-world exposure. Encourage participation in hackathons, coding competitions, and open-source projects.

3. Practical Exposure:

Emphasize hands-on learning, practical sessions, and real-world applications to reinforce theoretical concepts.

4. Extracurricular Activities:

Encourage participation in coding competitions, hackathons, and other extracurricular activities to enhance practical skills.

5. Faculty Development:

Support ongoing faculty development programs to keep educators abreast of the latest technologies and teaching methodologies.

6. Student Projects:

Encourage and support student-led projects, providing opportunities to showcase their creativity and problem-solving skills.
